Division with Arrays and Groups

Solve the division problems by using the arrays or by drawing groups.

1. Use the arrays to complete the division sentences.

a)  $18 \div 6 = \underline{\hspace{2cm}}$ There are $\underline{\hspace{2cm}}$ rows of $\underline{\hspace{2cm}}$.	b)  $20 \div 5 = \underline{\hspace{2cm}}$ There are $\underline{\hspace{2cm}}$ rows of $\underline{\hspace{2cm}}$.	c)  $20 \div 4 = \underline{\hspace{2cm}}$ There are $\underline{\hspace{2cm}}$ rows of $\underline{\hspace{2cm}}$.
---	--	---

2. Draw groups to show each division. Then complete the sentence.

a) $12 \div 3$		There are $\underline{\hspace{2cm}}$ groups of $\underline{\hspace{2cm}}$.
b) $15 \div 5$		There are $\underline{\hspace{2cm}}$ groups of $\underline{\hspace{2cm}}$.
c) $18 \div 6$		There are $\underline{\hspace{2cm}}$ groups of $\underline{\hspace{2cm}}$.

3. Use arrays or groups to solve these division problems.
Draw to help you. Write the division sentence and the answer.

a) $24 \div 4$ $\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$	b) $30 \div 6$ $\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$	c) $27 \div 3$ $\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$
--	--	--

4. Write a division sentence for each situation.

a) There are 28 biscuits. They are shared equally among 7 children. How many biscuits does each child get?  $\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$	b) There are 36 stars. They are put into 4 equal groups. How many stars are in each group?  $\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$
--	--
