Name: _____ Date: _____

Picture Division: Groups and Arrays

Solve the division problems by drawing or interpreting pictures showing equal groups or rectangular arrays, then write the corresponding division equation.

1. There are 20 counters. Share them equally into 4 groups. Draw the groups and write the division equation.

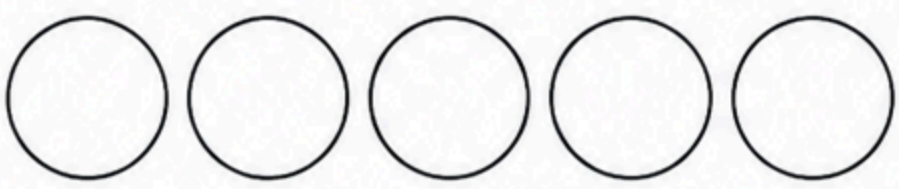

_____ ÷ _____ = _____

2. There are 18 stars arranged in an array. Write the division equation for this array.

_____ ÷ _____ = _____

3. There are 15 apples. Share them equally into 5 groups. Draw the groups and write the division equation.

_____ ÷ _____ = _____

4. There are 16 cupcakes arranged in an array. Write the division equation for this array.

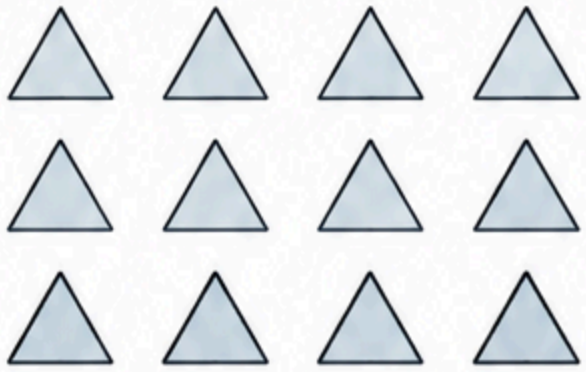

_____ ÷ _____ = _____

5. There are 24 blocks. Share them equally into 6 groups. Draw the groups and write the division equation.

_____ ÷ _____ = _____

6. There are 12 triangles arranged in an array. Write the division equation for this array.

_____ ÷ _____ = _____
