Name: _____ Date: _____

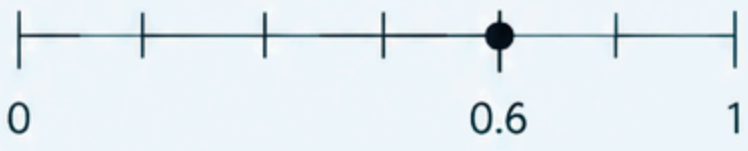

Decimal Number Line Placement

Identify and mark the decimal positions on the number lines.
Use the given scale and think about the size and place value of each decimal.

Remember:

- Decimals show parts of a whole.
- The place value tells us the size (e.g. tenths, hundredths).
- The number line helps us see where a decimal is located.

Example: 0.6

1. Place the following decimals on the number line.

0.2 0.4 0.8 1.1

2. Place the following decimals on the number line.

3.2 3.5 3.8 4.1

3. Place the following decimals on the number line.

5.05 5.15 5.25 5.35

4. Place the following decimals on the number line.

7.46 7.52 7.58 7.64

5. Think about the decimal numbers below. Write the two that are closest together.

a) 0.3 and 0.8 _____

b) 2.4 and 2.9 _____

c) 5.12 and 5.18 _____

d) 7.56 and 7.61 _____
